

ACCESS CONTROL APPARATUS, SYSTEMS, AND METHODS

Abstract of the Disclosure

5 An apparatus and a system, as well as a method and article, may operate to enable execution of a first application on a master device by allocating a master license and at least one shareable license to the master device, and to enable execution of a second application (which may be the same as the first application) on a shareable device by executing the first application on the master device and by allocating the at least one shareable license to the shareable device.
